Probability Statistics And Random Processes
By Veerarajan 2nd Edition. Probability,
Statistics And Random Processes With
Queueing Theory And Queueing Networks. T.
Veerarajan. Professor of Mathematics and
Head. Category:2002 non-fiction books
Category:Mathematics books
Category:Statistical textbooksThe volume of
material is extraordinary. There is all sorts of
information on speech on the back of the A3
page. The pages are very very light: the whole
page is lighter than tissue paper. I think I
might ask Bryan to wrap some of the stuff that
would otherwise get lost. He could add some
full or half-gloss foils and have it bound in
special covers. Oh, and I should ask him to
also write in the front and back covers a bit
about what they contain. So it's going to be
quite long as there is a lot to say. I don't have
time to respond in detail. It would be great if

someone could make a list of things to include for a draft. Re: Theoretical Bible study on eye movement I, II, III I don't know if it's appropriate to throw the baby out with the bathwater. The time issue is not about the book size. In fact, you might think of posting it in sections. It will become long and it's going to be hard to respond to comments, but that's fine. There are a lot of issues, you'll find. It's not a simple issue. The other point is that I'm curious to see what the students have to say. IMHO: Of course, you decide, but I have to agree with Catherine, Bryan, and others, that the best outcome would be to produce something of quality, that stands the test of time. I don't think a "long book" is necessarily bad. Consider the material that you've already collected for the critique posts, the commentary. You would think that people like it. Given the information you've already

collected for the issues raised by the students, there is quite a bit to say. Re: Theoretical Bible study on eye movement I, II, III I agree that you should go ahead and post it all, but I would suggest that if the students have the time they want to read it from the beginning they may want to pick up on one section
